Mexico Foods, LLC dba El Rancho Corp. seeks Senior System Developers in Addison, TX.

Assist and support the IT Department by analyzing IT systems and networks, modifying existing systems for better optimization, and designing efficient technology systems from clients' specifications and business needs. Provide technical expertise and solutions in integrating group solution with local systems and to support and enhance existing applications. Write technical procedures and documentation for the applications including production support procedure and user configuration guide. Serve as a core member of a development team that designs and develops software applications. Quickly generate and update HTML prototypes from UI concepts for testing and team feedback. Develop OMNI Channel customer experience based on a foundation of Manhattan DOMS. Define the detailed object design and interaction, method level implementation details, and code structure needed to implement the technical design and product architecture. Perform root cause analysis in defect resolution and while debugging. Review high level design to ensure the application is build-able. Lead and guides developers in day-to-day activities. Identify reuse opportunities and designs for reuse as appropriate.

Position requires a Bachelor's degree in Information Technology, Computer Science, Systems Engineering, or a related field and 2 years of experience analyzing IT systems and networks; designing efficient technology systems; designing and developing software applications; and working with HTML. Spanish language proficiency required.

Must also have authority to work permanently in the U.S. Applicants who are interested in this position may apply at www.jobpostingtoday.com (Ref # 69296) for consideration.
